Following comments were submitted online:

Parcel No:

Subject: Agriculture

Comments:

The plan should address preservation of agricultural resource lands to provide local sources of wholesome food and provide ground water recharge and wildlife habitat. Land available for a range of farm sizes is needed. Agricultural resource land in the western half of the county should be prioritized because of its soil quality and water availability. Small to medium owner operated farms could provide a significant source of quality employment. Opportunity for comment is inadequate.
