Victoria

Thanks for your e-mail. The proposal is to change the minimum parcel size for all property zoned for agriculture from 20 acres (AG-20) to 10 acres (AG-10). All property would continue to be zoned for agriculture. Since you only have a little more than an acre, nothing would change in terms of how you use your property. The proposed change would be significant mostly for folks with bigger parcels who might be able to divide such parcels.

Hello ~

We are caring for our mother, who has a serious illness. We cannot attend either open house. Can you please help us out and tell us how this zoning change affects our acre? In the future, we planned on building one single family home on this acre or selling the one acre.

Current zoning - AG-20
Proposed zoning _ AG 10

Your help in the matter is much appreciated. Thanks in advance.

Mark and Victoria Zadeh, Rivoli Marketing, LLC

I understand this website helps but your response is still appreciated.
