Subject: Road Upgrades

Comments:

SR 500 east out of Orchards MUST be upgraded under the plan in out years. That particular highway is a narrow 2-lane road, has no shoulder, the speed limit is 50 mph, and it has very heavy traffic -- including all truck traffic from the Livingston Mountain quarry. Even school buses have no pull-off allowances (or emergency strips). This road was built to handle 1950's traffic -- and no improvements have been made over the years to handle the increased population in east county as well as the near-constant gravel/rock truck traffic. I've communicated with DOT several times regarding the hazards of this road, yet there are NO plans to improve this road. This road has NOT kept pace with the growth of Clark county and needs to be upgraded/improved in the worst way. Thank you for considering this recommendation.
