CLARK COUNTY, WASHINGTON RESOLUTION NO. 2015-11-02

A RESOLUTION relating to adoption of the 2016-2021 Six-Year Transportation Improvement Program (TIP).

WHEREAS, a public hearing on the 2016-2021 Transportation Improvement Program was held at 10:00 A.M., Tuesday, November 10, 2015 in accordance with RCW 36.81.121 and WAC 136.16.010; and,

WHEREAS, this is to certify that a priority array of potential projects on this County's arterial system was prepared under the direction of the Director of Public Works and was available to the Board of County Councilors during the preparation of these programs in accordance with WAC 136-14-050; and.

WHEREAS, this is to certify that a written report with respect to deficient bridges was prepared under the direction of the Director of Public Works and was available to the Board of County Councilors during the preparation of these programs in accordance with WAC 136-20-060; and,

WHEREAS, this Transportation Improvement Program has been analyzed to establish its consistency with the adopted Comprehensive Plan and adopted policies in the Community Framework Plan; and,

WHEREAS, this Transportation Improvement Program has been analyzed to establish Clark County's financial capability of completing the projects that are contained within the Program in accordance with chapter 36.70A RCW; and,

WHEREAS, the County commits to funding those projects so designated as "Reasonably Funded" in the program for purposes of Concurrency, as shown in the Financial Analysis section of the TIP, incorporated by reference; and,

WHEREAS, the Board of County Councilors is in regular session assembled this day.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COUNCILORS OF CLARK COUNTY, STATE OF WASHINGTON, that the attached 2016-2021 Transportation Improvement Program, as submitted by the Director of Public Works, is hereby adopted.

DATED this 16th day of NOV.	, 2015.
ATTEST: Clerk to the Board	BOARD OF COUNTY COUNCILORS FOR CLARK COUNTY, WASHINGTON DAVID MADORE, Chair
APPROVED AS TO FORM ONLY:	DAVID MADORE, Onaii
ANTHONY F. GOLIK Prosecuting Attorney	TOM MIELKE, Councilor
BY: CHRIS HORNE, Chief Civil Deputy Prosecuting Attorney	JEANNE E. STEWART, Councilor

CLARK COUNTY, WASHINGTON RESOLUTION NO. 2015-11-03

A RESOLUTION relating to adoption of the 2016 Annual Construction Program element of the 2016-2021 Six-Year Transportation Improvement Program (TIP).

WHEREAS, a public hearing on the 2016 Annual Construction Program was held at 10:00 A.M., Tuesday, November 10, 2015 in accordance with RCW 36.81.121 and WAC 136.16.010; and,

WHEREAS, this is to certify that a priority array of potential projects on this County's arterial system was prepared under the direction of the Director of Public Works and was available to the Board of County Councilors during the preparation of these programs in accordance with WAC 136-14-050; and,

WHEREAS, this Annual Construction Program has been analyzed to establish its consistency with the adopted Transportation Improvement Program; and,

WHEREAS, this Annual Construction Program has been analyzed to establish Clark County's financial capability of completing the projects that are contained within the Program; and,

WHEREAS, the Board of County Councilors is in regular session assembled this day.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COUNCILORS OF CLARK COUNTY, STATE OF WASHINGTON, that the 2016 Annual Construction Program element of the 2016-2021 Transportation Improvement Program, as submitted by the Director of Public Works and attached and incorporated by reference, is hereby adopted.

DATED this day of day of	, 2015.

INTRODUCTION

Clark County's 2016-2021 Six-Year Transportation Improvement Program (TIP) is essential to implementing the goals of the Clark County Comprehensive Plan and 20-Year Capital Facility Plan. The TIP uses objective criteria to evaluate and prioritize road improvement projects, and assigns available revenues to projects to achieve those goals. While addressing regional transportation priorities, the TIP recognizes the vision set by the community and the Board of County Councilors.

Aside from the practical reasons for developing the TIP, there are legal requirements. State law (WAC 136.15.050) requires Clark County to prepare and update annually a six-year comprehensive transportation program. The WAC specifies that the TIP shall be adopted by the county legislative authority each year and shall include all planned road and bridge construction projects, path/trail projects, and any other specified capital outlays for the following six-year period.

Questions or comments regarding the content or development of this program can be directed to Clark County Customer Service at (360) 397-6118 ext. 4944.

WHAT IS IN THE TRANSPORTATION IMPROVEMENT PROGRAM?

The remainder of this document includes:

- A description of the process used to develop the program
- Director's Note
- An analysis of financial constraints
- The six-year program funding matrix
- The annual construction program for 2016
- An index and map of the projects included in the program
- Traffic Impact Fee (TIF) area maps
- Detail sheets for all funded road projects in the six-year program

DIRECTOR'S NOTE

As the local economy continues to heat up, Clark County is planning, designing and building transportation infrastructure to support the growing economy. At the same time, Clark County is struggling to keep up with expected demand as the county's population surges toward 500,000.

The county's focus remains on building projects that improve safety, ease congestion and preserve the public's investment in nearly 2,700 lane miles of county roads and 76 county bridges, including three pedestrian bridges.

These priorities are reflected in the Six-Year Transportation Improvement Program (TIP), which outlines how an estimated \$169 million will be spent on design, right of way and construction during the next six years.

The 2016-2021 TIP envisions the county continuing to upgrade the NE 119th Street corridor. A contractor working for the county is expected to finish the current project, between NE 72nd Avenue and NE 87th Avenue, in 2016. Additional phases are planned for subsequent years:

- NE 119th Street, NE 50th Avenue to NE 72nd Avenue –Construction is tentatively scheduled for 2017 and is expected to take a single season to complete.
- NE 119th Street, NE 87th Avenue to NE 112th Avenue –Construction is tentatively scheduled for 2018 and is expected to take two seasons to complete.

In 2016, Clark County will complete the construction of the NE 94th Avenue project, from Padden Parkway to NE 99th Street. The project will improve safety and mobility on Padden Parkway by adding acceleration lanes, so vehicles entering from NE 94th Avenue will have additional room for merging.

In 2015, Clark County coordinated with the county's legislative delegation to secure \$50 million in state funds, beginning in 2023, for rebuilding the NE 179th Street interchange on Interstate 5 and improving local roads. There is little capacity remaining in the NE 179th Street corridor near the freeway, and job-creating projects could be delayed due to inadequate infrastructure and a shortage of immediate funding.

In 2017, Clark County will begin construction on NE 10th Avenue between NE 154th Street and NE 164th Street. This project will widen and connect NE 10th Avenue along the west side of I-5, including building a bridge over Whipple Creek. This project will close a gap in the transportation grid, upgrade a substandard roadway, improve access to recreational facilities, provide an alternate route for emergency responders, construct bicycle and pedestrian facilities, create another access to the Clark County Fairgrounds for disaster

response and support Clark County's 20-year comprehensive plan and economic growth in the Discovery Corridor.

The county also will continue improving operations of more than 100 traffic signals, including a traffic signal optimization project in Orchards this year. Clark County embraces emerging technology to collect data and refine signal timing and coordination on busy corridors. The county is working collaboratively with neighboring cities and the state to promote signal interconnectivity and create a seamless system.

In addition, battery backups have been installed at more than half of county traffic signals so those signals will continue to operate normally for two hours during power failures. Battery backups allow traffic signals to operate for another eight hours in all-red flash mode during prolonged power failures.

Last year, Clark County demolished and replaced Fifth Plain Creek Bridge, on NE 88th Street near Proebstel. The previous bridge, which was built in 1933 and partially reconstructed in 1949, was the last wood support bridge owned by Clark County. It also was the only county-owned bridge classified as "structurally deficient," which means a bridge's condition or design has affected its ability to carry traffic.

Clark County will continue its proactive bridge program in 2016 with two projects:

- Replacing Cedar Creek Bridge on NE Etna Road, just south of the North Fork of the Lewis River in north Clark County. Cedar Creek Bridge was built in 1946 and is the fourth-oldest bridge among the 76 county-owned bridges. It also is one of two weight-restricted bridges owned by the county.
- Seismically retrofitting Brush Prairie Bridge, on NE 156th Street just east of Ne 102nd Avenue, along with installing countermeasures to prevent scour. Scour is a type of water erosion that can undermine bridge piers and abutments. Scour is the nation's most common cause of highway bridge failures.

Clark County also will continue its robust preservation program in 2016 to extend the life of county roads. The 2016-2021 Transportation Improvement Program envisions spending \$50 million on asphalt overlays, full depth reclamations and other preservative measures during the next six years.

This emphasis is grounded in common sense. An asphalt overlay can extend a road's life by 15 to 20 years. For every \$1 Clark County spends to preserve a road this year, it avoids spending 10 to 15 times that amount to rebuild the road in the future.

Heath Henderson, P.E. Public Work Director/County Engineer January 2016

PROGRAM DEVELOPMENT

PROCESS SUMMARY

The development of the Transportation Improvement Program (TIP) includes the following steps and processes:

<u>Defining a Vision</u> - Define the Board of County Councilor's vision and expectations and obtain endorsement for the TIP development process. Much of this vision has been defined in the 20-year Capital Facility Plan through the County Comprehensive Growth Plan.

<u>Assembling a Project Team</u> - Establish a project team with the resources to execute the TIP development plan.

<u>Reviewing the Existing Program</u> - Define successful elements of the previous TIP and potential areas for improvement.

- * <u>Identifying Applicable Projects</u> Establish an initial list of projects.
- * <u>Preparing an Evaluation Criteria</u> Create a clearly defined list of quantifiable and/or qualitative measures for project evaluation.
- * <u>Collecting Data</u> Prepare a scope, preliminary estimate, and graphic representation of each project. Provide supplementary data for evaluation criteria.
- * <u>Evaluating Projects</u> Measure and rank each project based upon evaluation criteria and supporting data.

<u>Preparing a Draft Plan</u> - Compile a working document for review and refinement.

Reviewing the Draft Plan - Acquire input and comments from stakeholders/participants.

Adopting the TIP – The Board of County Councilor's adopts the TIP through a public hearing process.

<u>Assessing the Plan</u> - Continual refinement and improvement of plan and development process.

PUBLIC INVOLVEMENT PROCESS

An important component of the Transportation Improvement Program is to inform the public about transportation projects in the community, which is accomplished throughout the year. Public involvement includes BOCC work sessions, community open houses, public hearings, SEPAs, presentations to neighborhood and business associations, a Web site, access to a current TIP in the Vancouver Community Library, news releases, and newspaper advertisements.

^{*} This step/process is executed approximately every 2-4 years (pending financial constraints).

PROJECT IDENTIFICATION

Capital Improvement Projects

Projects within the Transportation Improvement Program (TIP) include new roadways, roadway widening, bridges, pavement preservation projects, landslide and culvert repairs, and pedestrian and bicycle facilities. With the exception of the ongoing programs, we currently identify new projects on a biennial cycle, concurrent with the public involvement process. With few exceptions, no capital improvement projects are considered without ample opportunity for public input.

Per RCW 36.81.121, the TIP must be consistent with the county's adopted Comprehensive Growth Plan. The 20-year Capital Facilities Plan (CFP) reflects transportation priorities in the Comprehensive Plan. As a result, the TIP must consider projects from the CFP. After including the CFP projects in the TIP priority array, there is little funding available for projects that are not included in the CFP.

Ongoing Programs

Ongoing Programs were established to fund specific categories of projects. While these are not major arterial corridor projects, they are important for citizens' safety or system integrity. These programs include:

- Advanced right-of-way purchases program.
- Bridge repair/rehabilitation improvement program.
- Road preservation program.
- Rural road improvement program.
- Sidewalk and Americans with Disabilities Act compliance program.
- Transportation safety improvement program.
- Urban development road program.

See the ongoing programs detail sheets section for descriptions of each of the ongoing programs.

Projects within the ongoing programs are brought forward by the Board of County Councilors, citizens, and staff members throughout the year as needs are identified. Safety and pedestrian projects considered for funding are generally taken from the Roadway Conditions Inventory Report and the Clark County Bicycle and Pedestrian Plan, which is updated biannually. Bridge improvement projects are ranked annually based upon standardized bridge criteria. Road preservation and rural road projects are identified through a ratings and inventory process. For more details on the Bridge Improvement Program, contact Jean Singer at 397-6118 ext. 4823 and for the Preservation/Rural Road Program, contact Karen Carlie at 397-6118 ext. 1678.

PROJECT EVALUATION SYSTEM

The TIP project ranking and evaluation system is usually reviewed and altered on a biennial cycle during even-numbered years, concurrent with the public involvement process, and applies only to the capital improvement projects. Occasionally, a project may bypass the ranking process due to an urgent/emergency situation or to develop a regionally significant project in conjunction with an adjoining agency (i.e. Washington State Department of Transportation or City of Vancouver). Bridge projects often bypass the ranking system as they are ranked and evaluated separately in the Bridge Improvement Program.

The evaluation system is designed to provide an objective means to evaluate projects and rank them accordingly. Listed below are the measurement criteria that form the basis of the evaluation system:

- Safety (considering both collision data and exposure measures).
- Comparison to the Arterial Atlas.
- ° Concurrency.
- Multimodal.
- ° Route connectivity.
- Environmental impacts.
- Public/agency support.
- ° Support for economic development.
- Leveraging of outside (non-county) funding.

Based upon the established evaluation criteria, a weighted scoring system measures and assigns a numbered rank to each project. The system recognizes safety, mobility, and future development potential as the most important considerations in the ranking of projects. The system is outlined on the following pages.

EVALUATION CRITERIA

<u>Safety (Maximum Score = 30, Weight = 1)</u>

The safety criteria consider two significant measures of safety for a potential project. The first measure, or *collision score*, assigns points to a project based on actual collision history. The second measure, referred to as the *exposure score*, quantifies the substandard conditions that the project is intended to address.

Collision History:

The collision index considers the accident rate and the critical accident rate within the limits of each project. The *accident rate* is the total number of accidents per million vehicles

traveling through the project area. The *critical accident rate* is the rate expected due to normal variation. The *collision index* is the ratio of the accident rate to the critical rate. An index greater than one indicates that the intersection or corridor experiences more collisions than expected under normal conditions.

Accident rates are calculated according to the type of project under consideration as follows (Note: ADT = Average Daily Traffic):

$$\mbox{Corridor Accident Rate} = \frac{\mbox{Total \# of Accidents} \times 10^6}{\mbox{Segment Length} \times \mbox{ADT} \times \mbox{Years} \times 365}$$

Intersection Accident Rate =
$$\frac{\text{Total \# of Accidents} \times 10^6}{\text{ADT Entering} \times \text{Years} \times 365}$$
 (for intersection projects only)

The critical rate is calculated from the following formula:

Critical Rate =
$$\overline{R}$$
 + k × $\sqrt{\frac{\overline{R}}{m}}$ + $\frac{1}{2 \times m}$

Where:

 \overline{R} = 2.12 for segment

 $\overline{R} = 0.80$ for intersections

k = 1.645 (constant)

 $m = ADT \times Years \times 365 \times Length/10^6$

The collision index is then calculated:

Collision Index =
$$\frac{\text{Accident Rate}}{\text{Critical Rate}}$$

Finally, interpolation from the following scale provides the collision portion of the safety score:

Collision Index	Collision Score
♦ equal to or greater than 1.8	65
♦ equal to 1.0	20
♦ equal to .5	10
♦ equal to 0	0

Exposure:

The exposure score is a summation of several measures regarding the existing conditions in the field. Once those conditions are measured, the score is modified by the exposure index to account for the number of vehicles actually exposed to those conditions.

Exposure Measure Existing Shoulder Widths:	Score		
 ◇ Between 0 and 1 foot wide ◇ Between 1 and 2 feet wide ◇ Between 2 and 4 feet wide ◇ Between 4 and 8 feet wide ◇ Greater than 8 feet wide 	5.0 3.75 2.50 1.25		
Fixed Objects Adjacent to the Roadway (average number of objects per 100 f roadway):	eet of		
 ♦ 4 or more objects per 100 feet of roadway ♦ Between 3 and 4 objects per 100 feet of roadway ♦ Between 2 and 3 objects per 100 feet of roadway ♦ Between 1 and 2 objects per 100 feet of roadway ♦ 0 objects per 100-feet of roadway 	5.0 3.75 2.50 1.25		
Roadside Drop-off (distances from edge of roadway to bottom of hill, gully, et	tc.):		
 ◇ 30 feet and greater ◇ Between 20 and 30 feet ◇ Between 10 and 20 feet ◇ Between 1 and 10 feet ◇ Less than 1 foot 	5.0 3.75 2.50 1.25 0		
Bike Lanes (widths of existing bike lanes in urban area or shoulders in rural a paths may be considered wider than actual):	rea; separated		
 ◇ Between 0 and 2.5 feet ◇ Between 2.5 and 4 feet ◇ Between 4 and 5 feet ◇ 5 feet or more 	5.0 3.0 1.0 0		
Sidewalks (existing sidewalks or walkways along project corridor):			
 No existing sidewalks (shoulders for rural projects) Some existing sidewalks (at least 65 percent) Existing sidewalks along full length of project 	5.0 2.50 0		
Pedestrian Safety:	Pedestrian Safety:		
 Includes frontage to a school, park, or other high-volume source of pedestrian or bicycle use Directly serves a school or other high-volume source 	5.0		
of pedestrian or bicycle use	3.0		

Other Issues (horizontal/vertical alignment, sight distance, intersection alignment)

♦ Existing alignment, sight distance deficiencies
 ♦ No existing alignment, sight distance deficiencies
 0

Exposure Index =
$$\left(\frac{AADT}{1,000}\right) \le 1.0$$
 (maximum value of 1)

Exposure Score = Exposure Index X Sum of Exposures (maximum score = 35 points)

Raw Safety Score = Collision Score + Exposure Score (maximum score = 100 points)

There is a maximum of 100 points that a project can accrue from the eight elements in the safety category as previously shown (65 points for collision history and 35 points for exposure). Once a project has been scored against these elements and a score total has been derived, the project is assigned a final score for the safety criteria as follows:

Final Safety Score = Safety Score
$$\times \left(\frac{30}{100}\right)$$

Comparison to County Arterial Atlas (Maximum Score = 5, Weight = 2)

Comparison of project's existing roadway section with the section specified in the County Arterial Atlas:

\Diamond	Requires additional travel lanes	1
\Diamond	Requires center/left-turn lane	2
\Diamond	Requires sidewalks (shoulders for rural)	1
\Diamond	Requires bike lanes (shoulders for rural)	1
\Diamond	Other projects	0

<u>Concurrency (Maximum Score = 10, Weight = 1)</u>

Concurrency standards are measured in terms of "average travel speed" for corridors (measured by standards set forth in Chapter 12.41, transportation concurrency management system), and level of service (LOS) for intersections (LOS measured by standards set forth in the Highway Capacity Manual, with LOS E indicating failure):

♦ The project will improve one or more intersections of regional significance that are:

	♦ Failing	6
	Within 10 percent of failing	4
\Diamond	The project will improve an adopted concurrency corridor that is:	
	♦ Failing (below the threshold corridor speed)	3
	♦ Within 3 mph of failing	2

\Diamond	The project will improve conditions in an adopted transportation	
	moratorium area	1
	Does not address any concurrency or LOS concerns	0
\Diamond	The project will improve critical transportation features within or	
	immediately adjacent to a current or past urban holding area:	
	♦ Significant improvements	4
	Partial improvements	2

Multimodal (Maximum Score = 6, Weight = 1)

Transit or bike/pedestrian system improvements (note that addition of bike lanes and sidewalks is included in the "comparison to county Arterial Atlas" criteria above):

\Diamond	Completes missing links in existing bike/pedestrian system	2
\Diamond	Improves access to a Park & Ride facility	2
\Diamond	Improves the operation of a C-TRAN route within project limits	2
\Diamond	Improves trail connectivity (2006 adopted Regional Trail & Bikeway Systems Plan)	1

Route Connectivity (Maximum Score = 5, Weight = 2)

Project's link with other arterial and collector routes:

\Diamond	Project is linked to primary route (arterial or above) AND	
	secondary route (collector)	3
	OR	
\Diamond	Project links two primary routes	2
	OR	
\Diamond	Project links two secondary routes	1
\Diamond	Gap project	2
\Diamond	Other projects	0

<u>Environmental Mitigation (Maximum Score = 6, Weight = 1)</u>

Based upon preliminary review by County staff, each project will be given a score of six and then points will be deducted, based on the following environmental impacts types (lowest possible score equals zero):

\Diamond	No significant impacts anticipated	0
\Diamond	Low category wetland impact (roadside ditches, category 4	
	wetlands)	(3)
\Diamond	Medium category wetland impact (cumulative impacts/	
	category 2, 3 wetlands)	(4)
\Diamond	High category wetland impact (category 1 wetlands includes ESA	
	impacts)	(5)
\Diamond	Stream impact (with or without wetland impact)	(2)

\Diamond	Shoreline impact (with or without wetland impact)	(1)
\Diamond	Cultural/archeological/historical - low impacts	0
\Diamond	Cultural/archeological/historical - medium impacts	(1)
\Diamond	Cultural/archeological/historical - high impacts	(2)
\Diamond	Wetland/habitat fragmentation impact	(6)

Public and Outside Agency Support (Maximum Score = 2, Weight = 1)

\Diamond	Supported by the Regional Transportation Council, State	
	Transportation Plan, or surrounding cities	1
\Diamond	Supported by the public (TIPIT, adopted neighborhood circulation plan)	1
\Diamond	No known support by public or local agencies	0

<u>Support for Economic Development (Maximum Score = 20, Weight = 1)</u>

The number of potential future jobs used for scoring the projects is determined by the following:

1. The following property within one quarter-mile (0.25) of the project limits is determined using GIS data:

♦ For vacant industrial property:

Vacant ≈ 6.75 jobs/gross acreUnderused ≈ 6.75 jobs/gross acreVacant critical ≈ 3.37 jobs/gross acreUnderused critical ≈ 3.37 jobs/gross acre

♦ For commercial property:

Vacant 15 jobs/gross acre
Underused 15 jobs/gross acre
Vacant with critical 12 jobs/gross acre

- 2. The potential future jobs are calculated by multiplying the total acreage times the job per gross acre. Values for jobs per gross acre (shown above) are based on adopted land use planning criteria for Clark County. Those values take into account loss of land to infrastructure and environmental constraints.
- 3. The potential future number of jobs in the area is then used to determine the score.
 - Improves access to or is within the priority adopted focused public investment areas:
 - Operation Potential future industrial jobs within one quarter-mile of project:

\Diamond	450 or more	7
\Diamond	350 to 449	5
\Diamond	250 to 349	3

	♦ 140 to 249	1
\Diamond	Potential future commercial jobs within one quarter-	mile of project:
	♦ 1300 or more	3
	♦ 700 to 1299	2
	♦ 300 to 699	1
\Diamond	Other projects	C

<u>Leveraging of Non-County Funding (Maximum Score = 6, Weight = 1)</u>

State/federal grant sources, regional, municipal, or other non-county funds:

\Diamond	50% outside funds available	6
\Diamond	40% outside funds available	5
\Diamond	30% outside funds available	4
\Diamond	20% outside funds available	3
\Diamond	10% outside funds available	2
\Diamond	No funds committed	0

The scores within each criterion are multiplied by the weighting factor to give a total score for the criteria. The sum of the nine criteria scores result in a total score and ranking for the project. Refer to the attached priority array for project specific scoring and ranking information.

The outcome of the scoring/ranking process defines the priority for each project. The resulting priority array is used as the starting point to decide which projects are funded in the next six years.

In past years, there was concern expressed as to the rationale for evaluating and ranking projects that are currently under way. The concern is that these projects have previously been evaluated and targeted for completion, thereby obligating the county to finish the project. To address this issue, the TIPIT recommended removing these projects from the ranking order.

To separate those projects, an "obligated" category was created. If a project has 10 percent or greater of its total projected cost already expended, the project is considered to be one that the county is committed to completing. The project is assigned an "obligated" status and not re-ranked. However, spending 10 percent or more of a project's budget generally indicates that, at a minimum, the engineering is well under way and the project has entered the right-of-way phase.

Obligated capital projects are listed alphabetically and assigned a letter in that order. The assigned letter does not indicate priority in any way.

PROGRAMMING CONSIDERATIONS

After establishing the priority array, available program dollars are assigned to projects with consideration to the following:

- Available grant funds.
- ° Available TIF funds.
- ° The priority array.
- ° Board of Councilors' special projects.
- Regional transportation priorities.

The six-year program matrix displays only those projects that have funding in at least one phase of the project during the next six years.

TITLE VI AND VII COMPLIANCE

Clark County operating policies reflect official commitment that there shall be opportunity, free from discrimination, for all persons. The policy refers to employment, the provision of all county services, and services of its contractors. The county's practices of non-discrimination are consistent with Title VI and VII of the 1964 Civil Rights Act, as amended.

Federal and state grants require that the county, its contractors, subcontractors, and other sub recipients who receive federal funds actively ensure non-discrimination in all of their programs and activities. These obligations apply even if those other programs and activities are not federally funded. It is county policy to give all bidders an equal opportunity to bid and compete on equal terms. Disadvantaged Business Enterprises (DBE) are encouraged to respond to every applicable contracting opportunity. The county will ensure all businesses the opportunity to participate in the county's purchasing processes, fairly and competitively. If you have questions about the federal funding process, you are encouraged to contact the Public Works Department at (360) 397-6118. Questions concerning the county's procurement procedures or policies should be directed to the Purchasing Division at (360) 397-2323. Information is also available on the county's website: www.clark.wa.gov.

FINANCIAL ANALYSIS

There are several funding sources available for engineering/design, right-of-way land purchases, and construction of transportation improvements. The Clark County Road Fund provides the principal source of dollars and leverages grants and developer funds. This local money is supplemented by federal and state dollars administered through different agencies. Below is a brief description of available funds, along with an explanation of projected revenues from each source (see figure 2 on page 21 for percentage of program funded by the various grants over 6-years).

FEDERAL FUNDING SOURCES:

The federal gas tax and other transportation fees and taxes are the major federal revenue sources for transportation funding. On December 4, 2015, the President signed into law the Fixing America's Surface Transportation Act (FAST) officially replacing MAP-21. It is important to note there are no programmatic changes in the FACT act FAST is a five year surface transportation authorization bill which will provide spending levels for FY2016–FY2020.

The former bill, Moving Ahead for Progress in the 21st Century Act (MAP-21) provided funding for fiscal years 2013, 2014, and 2015. MAP-21 incorporated performance measures to provide a more efficient investment of federal transportation funds and restructured core transportation programs. This document includes a brief description of FAST Program. The only programs that are included in this document are funding sources that Clark County qualifies for.

<u>National Highway Performance Program:</u> The FAST Program focuses on preserving the pavements and bridges of the National Highway System. The program consolidates the Interstate Maintenance, National Highway System, and Highway Bridge Programs.

1. National Highway System (NHS): The National Highway System consists of major roads in the U.S. including the interstate system, other routes identified for their strategic defense characteristics, routes providing access to major ports, airports, public transportation and intermodal transportation facilities, and selected principal arterials. Funding in this category may be used for a wide variety of projects. The State selects projects for funding.

Bridges located on the interstate or the National Highway System are eligible for funding under the National Highway Performance Program. Bridges that are not located on the federal-aid system are provided a separate set-aside in the Surface Transportation Program. However, that leaves the majority of the local agency bridges on the federal-aid system without dedicated funding. Therefore, in Washington, the Steering Committee created a set-aside for a local bridge program.

<u>Surface Transportation Program (STP):</u> Under FAST, 50% of STP funds must be suballocated by population for regional competitive project selection. Off-System Bridges are funded through this program. STP consists of a block grant type funding program for use by states and localities for functionally classified roads above urban local or rural minor collector. These programs include:

- **STP-Urban**: Formula allocation to the Clark County Transportation Management Area based on the population of the Vancouver Urban Area.
- **STP-Rural**: Formula allocation for projects outside the Urban Areas.

Projects funded by the Surface Transportation Program are selected by the Regional Transportation Council (RTC)/Metropolitan Planning Organization (MPO). Clark County was awarded \$3.4 million to construct NE 94th Avenue (Padden Parkway to NE 99th Street) and \$2 million to design and construction NE 119th Street (NE 50th Avenue to NE 72nd Avenue). Carty Road Reconstruction received \$1.3 million in STP-Rural.

Congestion Mitigation and Air Quality (CMAQ): The CMAQ Improvement Program provides funding for projects and programs in air quality nonattainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter (PM-10, PM-2.5) which reduce transportation related emissions. RTC selects projects for funding through a competitive process. The County was awarded \$0.92 million to fund the Working to Refine IntelliGent Highway Transportation (WRIGHT). WRIGHT adds Adaptive Signal Systems on NE 139th Street. In the past, CMAQ funding supported approximately \$7.8 million over several years to improve traffic signal systems in the Barberton, Hazel Dell/Felida and Orchards area; and along Padden Parkway, Andresen Road, NE 78th Street, NE 99th Street and Highway 99.

Highway Safety Improvement Program (HSIP): FAST retained the Highway Safety Improvement Program. This program under MAP-21 (FAST will follow suite) began in FY 2006 to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. States are required to develop and implement a strategic highway safety plan and submit annual reports describing at least 5% of the State's most hazardous locations, progress in implementing projects and their effectiveness in reducing fatalities and injuries. Available programs include: 1) Railway/Highway Crossing, 2) Intersection and Corridor Safety, 3) Rural County Two-Lane Roadway. There is no 2016 call for projects. However, last year, \$1.9 million was awarded to upgrade guardrail systems along Hayes, Washougal River Road, and Lockwood Creek Roads.

<u>Transportation Alternatives:</u> The TAP funds are allocated to RTC for the Clark, Skamania, and Klickitat County region, with varying amounts being allocated to U.S. Census defined urban and rural areas. The TAP program is used for community improvement such as pedestrian and bicycle facilities, viewing areas, and other qualify activities. Recently, TAP funding in the amount of \$200,000 was awarded to support the Highway 99 Pedestrian/Bicycle Improvements project.

<u>Safe Routes to School Program:</u> This program seeks to enable and encourage children, including those with disabilities, to walk and bicycle to school; to make walking and bicycling to school safe and more appealing; and to facilitate the planning, development, and implementation of projects that will improve safety, and reduce traffic, fuel consumption, and air pollution in the vicinity of schools. The Highway 99 Pedestrian/Bicycle Improvements project was awarded State Ped/Bike funding of \$335,000.

Federal Lands Access Program (FLAP): The Federal Lands Access Program (Access Program) was established in 23 U.S.C. 204 to improve transportation facilities that provide access to, are adjacent to, or are located within Federal lands. The Access Program supplements State and local resources for public roads, transit systems, and other transportation facilities, with an emphasis on high-use recreation sites and economic generators. The program is designed to provide flexibility for a wide range of transportation projects in the 50 States, the District of Columbia, and Puerto Rico.

The Access Program is funded by contract authority from the Highway Trust Fund. Funds are subject to the overall Federal-aid obligation limitation. Funds will be allocated among the States using a new statutory formula based on road mileage, number of bridges, land area, and visitation. FLAP is providing funds to deliver the Main Avenue Access Improvement project which is approximately a half of milesidewalk/pedestrian trail. It is located at the north end of the Ridgefield City Limits and extends to the National Wildlife Refuge. This is a partnership project with Clark County, City of Ridgefield, Western Federal Lands and the National Wildlife Refuge. Western Federal Lands will deliver the project while Clark County and City of Ridgefield are providing match. Last year, NE Sunset Falls Road Pavement Rehabilitation was awarded just under \$2.5 million of FLAP funds.

<u>Projects of National and Regional Significance (PNRS):</u> The Projects of National and Regional Significance Program provides funding for high cost projects of national or regional importance. Projects are selected at the federal level.

STATE FUNDING SOURCES

In the State of Washington, the state motor vehicle fuel tax (MVFT), currently 37.5 cents/gallon, is shared among the cities, counties and the state Department of Transportation. This includes a dedication of a portion of the MVFT to grant programs managed by the Transportation Improvement Board (TIB) and the County Road Administration Board (CRAB).

<u>Transportation Improvement Board (TIB) funds:</u> The Washington State Legislature created the Transportation Improvement Board (TIB) to foster state investment in quality local transportation projects. TIB is an independent state agency that distributes and manages street construction and maintenance grants to 320 cities and urban counties throughout Washington State. The funding for TIB's grant programs come from revenue

generated by three cents of the statewide gas tax. The TIB requires multi-agency planning and coordination and public/private cooperation to further the goal of achieving a balanced transportation system in Washington.

Projects are reviewed and scored in TIB-defined category bands including Safety, Growth and Development, Physical Condition, and Mobility to determine funding. Clark County qualifies to participate in the following two TIB programs:

- **Urban Arterial Program (UAP):** In order to qualify for UAP funding, projects must be consistent with state, regional and local transportation plans. The local match requirement is determined by its road levy valuation, currently 20% for Clark County. Minimum local match ranges from 10 to 40 percent. Eligible agencies are counties with urban unincorporated arterials and cities with a population of five thousand or greater. Funds are distributed across five regions based on arterial lane miles and population. In the past few years, the intersection at NE 99th Street/SR-503 received approximately \$2.4 million. Also, the NE 119th Street/NE 72nd Avenue project was awarded \$2.25 million for intersection improvements.
- Urban Sidewalk Program (SP): The purpose of the program is to enhance and
 promote pedestrian mobility by providing funding for pedestrian projects that provide
 access and connectivity of pedestrian facilities. The selection criteria include safety,
 pedestrian generators, convenience, public acceptance, and project cost. Last year,
 Clark County was awarded \$250,000 to construct pedestrian/bicycle improvements
 along Highway 99 between NE 63rd Street to NE 78th Street.

County Road Administration Board (CRAB) funds: CRAB was created by the Legislature in 1965 to provide statutory oversight of Washington's 39 county road departments. The agency is funded from the portion of the counties' fuel tax that is withheld for state supervision and from a small portion of the two grant programs that the agency administers. The board establishes and maintains "standards of good practice" to guide and ensure consistency and professional management of county road departments in the state of Washington.

• Rural Arterial Program (RAP): In 1983, the legislature created the program to help finance the reconstruction of rural arterial roads. The program is funded with 0.58 cents of the Motor Vehicle Fuel Tax (MVFT). That level of funding generates approximately \$40 million per biennium. Carty Road Reconstruction (NE 10th Avenue to NW Hillhurst Road), NE Manley Road (NE 245th Street to NE 82nd Avenue), and NE Blair Road (NE 19th Street to NE Washougal River Road) have all received RAP funding within the past few years, which amounted to approximately \$1.6M.

County Arterial Preservation Program (CAPP): In 1990, the legislature created a
second grant program to be administered by CRAB. Similar to the Department of
Transportation's Highway Preservation Program, CAPP is designed to assist counties
in preserving their existing paved arterial road networks. The program is funded
with 0.45 cents of the Motor Vehicle Fuel Tax (MVFT), which generates
approximately \$30 million per biennium. Clark County receives approximately
\$738,000 per year in CAPP funds.

<u>Public Works Trust Fund (PWTF) funds:</u> The Public Works Board was created by the 1985 Legislature. The board is comprised of local government officials, special purpose district representatives, and private sector members. The mission of the Washington State Public Works Board is "to assist Washington's local governments and private water systems in meeting their public works needs to sustain livable communities." The board is authorized to loan money to counties, cities, and special purpose districts to repair, replace, or create domestic water systems, sanitary sewer systems, storm water systems, roads, streets, solid waste and recycling facilities, and bridges. The Public Works Board offers the following programs, subject to annual approval of funding by the Washington State Legislature:

Public Works Trust Fund (PWTF) Construction Loan Program: The PWTF Construction Loan Program provides funds to repair, replace, or create a facility. These loans have a 20-year term with interest now at market rates. The maximum for any agency is \$20 million dollars per biennium.

Public Works Trust Fund (PWTF) Pre-Construction Loan Program: The PWTF Pre-construction Loan Program provides funds for right-of-way acquisition, design, engineering, permit acquisition, environmental review, and public notification. These loans have a five-year term, with an interest rate as low as 0.5 percent. The maximum for any agency is \$1 million per biennium.

LOCAL FUNDING SOURCES

Local funding sources include funds that are not administered through State or Federal agencies. These funds are achieved though taxes, private contributions, and other revenues.

<u>Clark County Road Fund (CRF):</u> The funds are established through county property tax, gas tax, and other revenues. By state law, 0.5 percent of the annual gas tax allocation (or approximately \$32,000 per year) must be used for special projects, such as bikeways. The County Road Fund is comprised of various sources of revenue as shown by percentage in Figure 1 (page 21).

<u>Traffic Impact Fee (TIF):</u> New developments and re-developments are assessed TIFs, based on their impact on the transportation system. To be eligible for TIF funding, a project must be contained in the Traffic Impact Fee Program Technical Document that was revised

and adopted on September 25, 2007 (ordinance number 2007-09-14). The technical document defines the TIF areas and the allowable funding amounts for each project.

Road Improvement District (RID): RIDs are special projects which are funded by those properties benefiting from the improvement. The county will build the project, using revenue bonds from the RID participants. The 2016-21 TIP does not project any revenues from RIDs. Clark County will pursue a road improvement district if a project is applicable and the adjacent property owners express an interest in the program.

<u>Frontage Improvement Agreements (Private)</u>: A developer may enter into a frontage improvement agreement with the county where the developer pays the county for improvements along their road frontage. Most developments are required to construct frontage improvements (i.e. travel lanes, bike lanes, sidewalks, drainage, curb and gutter, and signal/intersection improvements) in cases where the development abuts a proposed road improvement project. It is often beneficial for the county to construct the improvements as part of the capital project.

<u>Private/Latecomers (Private)</u>: According to state law and Clark County Code 12.36, new developments and re-developments may be charged "latecomer fees" by the county for improvements that would have been required as a part of the development, but are scheduled to be constructed by the county. These latecomer fees are collected as a reimbursement to the county for that expense. Most projects shown on the six-year program matrix are considered eligible for latecomer reimbursement.

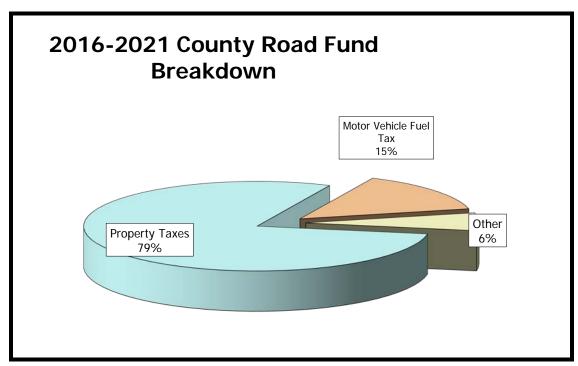

Figure 1

TIP EXPENDITURES

The expenditures in the 2016-2021 Transportation Improvement Program are from a combination of the sources discussed in prior pages. Figure 2 indicates the percentage each source contributes to the six-year TIP. The Clark County Road Fund accounts for over half of the TIP expenditures, with various grants and traffic impact fees covering remaining costs. Improving safety, capacity, and mobility is the focus of the program. It is important to note that all projects include aspects of safety, economic development, and mobility. Projects generally must include benefits to at least two of those three categories to score highly on the TIP. Figure 3 shows the 2016 annual construction program by project phase.

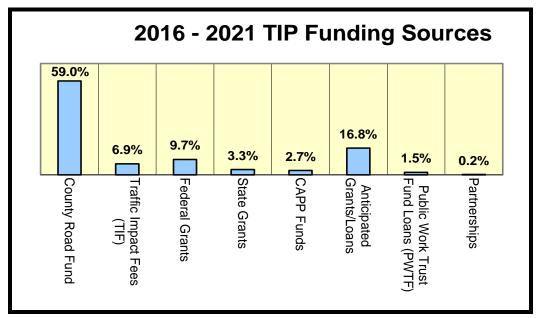

Figure 2

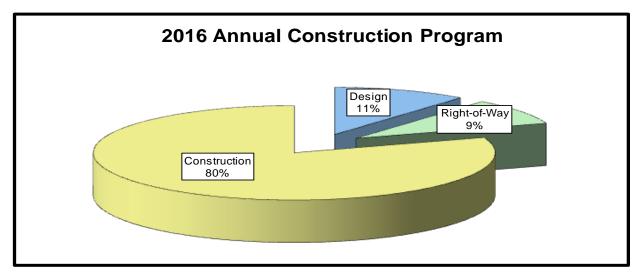

Figure 3

REASONABLY FUNDED PROJECTS

"Reasonably Funded" projects are defined based on ordinance 2007-09-12, adopted September 25, 2007 by the Board of Commissioners:

"Any improvements being implemented as part of the county's transportation improvement program that are reasonably funded and scheduled for completion of construction within six (6) years of the final date for a decision upon the development application."

These projects include the following:

Improvement Projects	TIP Priority
 NE 119th Street (NE 72nd Avenue to NE 87th Avenue) 	В
 NE 94th Avenue (NE Padden to NE 99th Street) 	С
 VAST: Orchards TSO (NE 55th Avenue to NE Ward Road) 	D
 NE 47th Avenue / NE 78th Street Intersection 	CO
 NE 99th Street / SR-503 Intersection (Urban Ongoing Program)) NA

2016 - 2021 Transportation Improvement Program Project Ranking and Evaluation System (Priority Array)

2016 - 2021 Transportation Improvement Program Advanced Right-of-Way Purchases Program

	Program Summary
Program Manager:	Steve Hansen
Program Description:	This program sets funds aside for right-of-way land acquisitions needed to preserve future transportation corridors.
Basis:	Cost overruns and purchase right-of-way in advance of projects being funded.
Timeline:	Ongoing
Notes:	See Ongoing Programs Matrix for proposed projects this year.
Budget:	Approximately \$10,000 per year is budgeted for the Advanced ROW program.

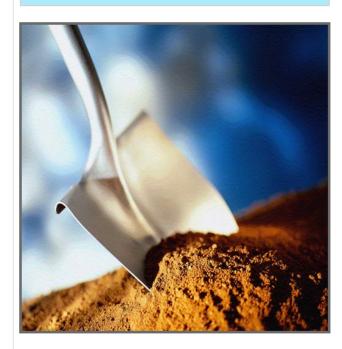

2016 - 2021 Transportation Improvement Program Bridge Repair, Rehab Program

Program Summary
Jean Singer
This program includes bridge repair, rehab, and bridge related improvements.
Replacing, repairing, and upgrading bridges.
Ongoing
See Ongoing Programs Matrix for proposed projects this year.
Approximately \$250,000 per year plus any grants received is budgeted for the Bridge Program.

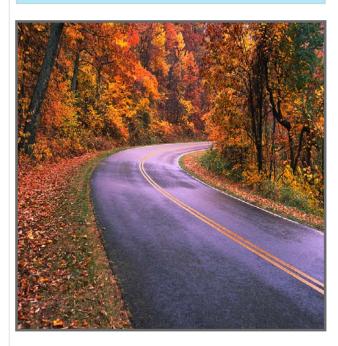

Road Preservation Program / County Wide Overlays

Program Summary Program Manager: Karen Carlie Program Description: This program addresses overlays and other preservation activities. This program also includes slope stabilization projects, guardrail, and ADA ramps relating to preservation, which are listed in the Sidewalk and Safety Ongoing Programs. Basis: Preservation of existing facilities. Timeline: Ongoing Notes: See Ongoing Programs Matrix for proposed projects this year. Budget: The preservation program budget is approximately \$6 million per year.

2016 - 2021 Transportation Improvement Program Rural Road Improvements Program

	Program Summary
Program Manager:	Karen Carlie
Program Description:	This program consists of shoulder widening, intersection improvements, culvert improvements, and slide stabilization in the rural areas of Clark County.
Basis:	Rural road improvements include shoulder widening, intersection improvements, culverts and upgrades, slide stabilization.
Timeline:	Ongoing
Notes:	See Ongoing Programs Matrix for proposed projects this year.
Budget:	An average of \$25,000 per year plus any grants received is budgeted for the Rural Road Program.

2016 - 2021 Transportation Improvement Program Sidewalks Program

	Program Summary
Program Manager:	Michael Derleth
Program Description:	This program addresses sidewalk/walkway needs and ADA compliance improvements.
Basis:	Construct sidewalks, walkways, bikeways, and ADA compliance improvements.
Timeline:	Ongoing
Notes:	See Ongoing Programs Matrix for proposed projects this year.
Budget:	Approximately \$350,000 per year plus any grants received for specific projects.

Transportation Safety Improvement Program

Program Summary Program Manager: Matt Griswold **Program Description:** This program consists of spot improvements to address safety, access management and signal projects in urban Clark County. Construct guardrails, traffic signal coordination/improvements, access Basis: management controls and other safety improvements. Timeline: Ongoing See Ongoing Programs Matrix for proposed projects this year. Notes: **Budget:** Approximately \$300,000 per year plus any grants received is allocated to support this program.

Urban Development Road Program

Program Summary Program Manager: Susan Wilson **Program Description:** The Urban Development Program will help identify road projects that stimulate economic development and directly support industrial and commercial development. This program will build projects that don't necessarily rank high in the traditional categories of safety and mobility but are critical to stimulate business development in the urban area of Clark County. Complete urban corridors, enhance freight movement and improve intersection Basis: concurrency issues. Timeline: Ongoing See Ongoing Programs Matrix for proposed projects this year. Notes: **Budget:** Approximately \$100,000 per year plus any grants received are allocated to support this program.

GLOSSARY OF FREQUENTLY USED TERMS AND ACRONYMS

ACP Annual Construction Program.

ADT Average Daily Traffic.

Access

Access is a means of approach to provide vehicular or pedestrian entrance or exit to a property. This may not necessarily include all movements.

Access Management

Access management is the process of providing and managing access to land development while preserving the regional flow of traffic in terms of safety, capacity, and speed.

A.M. Peak Hour

A.M. peak hour is identified by a one hour period in the morning when traffic flow increases. The a.m. peak hour typically occurs between 6:30 a.m. and 9:00 a.m. Traffic volumes occurring during the a.m. peak hour are used to calculate the overall operation of a roadway or intersection.

Arterial

An arterial is a major street carrying the traffic of local and collector streets to and from freeways and other major streets. Arterials generally have traffic signals at intersections and may have limits on driveway spacing and street intersection spacing (CCC 40.350.030(A)(5)(a)).

Biological Assessment

A biological assessment is an environmental document required for compliance with the Endangered Species Act for projects with federal funding or permits.

BRAC

Bridge Replacement Advisory Committee. The BRAC exists to advise WSDOT on the selection of appropriate bridge projects for funding under the federal Highway Bridge Replacement and Rehabilitation Program (HBRRP).

CAPP

County Arterial Preservation Program (State funding source) is a funding source for the County Road Administration Board (CRAB). CAPP is designed to assist counties to preserve their existing paved arterial road networks.

CCC Clark County Code.

CCRP

Corridor Congestion Relief Program (State funded).

CDBG

Community Development Block Grant. Block grants are targeted for low and moderate-income areas. Improvements usually consist of sidewalk and capital improvement programs.

CMAQ

Congestion Mitigation and Air Quality Improvement (Federal funding source). This funding is for projects that create a direct air quality benefit, leading toward attainment or maintenance of a National Ambient Air Quality Standard (NAAQS).

CRAB

County Road Administration Board. This agency is funded from the portion of the counties' fuel tax that is withheld for state supervision, and from a small portion of the two grant programs that it administers. The Board establishes and maintains "Standards of Good Practice" to guide and ensure consistency and professional management of county road departments in the State of Washington.

CRF

Clark County Road Fund. County road funds are established through annual County property tax, gas tax and other revenues.

C-TRAN

Clark County Public Transportation Benefit Area Authority, the transit agency for Clark County, Washington.

CWP Clean Water Program.

Capacity

The maximum rate of flow at which vehicles can be reasonably expected to traverse a point or uniform segment of a lane or roadway during a specified time period under prevailing roadway, traffic, and control conditions; usually expressed as vehicles per hour.

Collector Streets - Urban Collector

Collectors – Urban Collector. "Urban collector" provides for land access and traffic circulation within and between residential neighborhoods, and commercial and industrial areas. Direct access to adjacent land uses, however, is still subordinate to traffic movement. Access to abutting properties is controlled through the use of raised channelization, driveway spacing and pavement markings. Typically, collectors are not continuous for any great length, nor do they form a connected network by themselves. Parking is allowed only on two-lane urban collectors (see the Standard Details Manual) where bike lanes are not specified (CCC 40.350.030(A)(5)(b)).

Comprehensive Plan

A long-range plan, typically looking twenty to fifty years into the future, is intended to guide growth and development of a community. Comprehensive Plans are required by the Growth Management Act for specific counties and cities in

Washington State. The Plans establish goals and policies for managing population growth and land development while ensuring that the growth is adequately served by public facilities. Ordinance 1995-12-47 and Ordinance 1996-05-01 adopted the Clark County 20 Year Comprehensive Growth Management Plan.

Concurrency

The Concurrency ordinance (CCC 12.40) was adopted in response to the Washington State Growth Management Act, which required local jurisdictions to adopt level-of-service (LOS) standards for the arterial road system and to ensure maintaining those standards when considering new development. This process is called Concurrency, which applies to any development, land division, site plan, and conditional use permit approvals. It is intended to implement CCC 12.05.303 of the Road Standards.

EA Environmental Assessment.

ESA

The Endangered Species Act was established in 1973 to preserve ecosystems of endangered and threatened species. The Act was recently amended to include various species of fish, wildlife, and plants throughout the United States.

Environmental Review

The consideration of environmental factors as required by the Washington State Environmental Policy Act (SEPA). The environmental review process is the procedure used by agencies and others under SEPA for giving appropriate consideration to the environment in agency decision-making (WAC 197-11-746).

FAST

On December 4, 2015, the president signed into law, the Fixing America's Surface Transportation Act (FAST) to improve the Nation's surface transportation infrastructure. This law officially replaces the Moving Ahead for Progress in the 21st Century Act (MAP-21). The FAST Act is the first long-term surface transportation authorization bill signed into law since 2005. The bill reforms and strengthens transportation infrastructure including our roads and bridges.

Functional Classification System

The purpose of a functional classification system for county roads is to define varying levels and types of transportation infrastructure and to provide for the safe and efficient movement of people and goods, while preserving residential areas and maintaining the economic vitality of commercial and industrial areas. The system classifies transportation facilities as either urban or rural roads. Within urban roads, they are further divided into arterials, collectors, and access roads; within rural roads, they are divided into arterials, collectors and access roads. The county's classification system is intended to be in compliance with the federal classification system (CCC 40.350.030(A)(4)).

Growth Management

A group of strategies used by a government to direct the timing, location and type of development in a community.

Growth Management Act (GMA)

The State of Washington's Growth Management Act was adopted in 1990 to address the negative consequences of unprecedented population growth and suburban sprawl in the State. The GMA requires all cities and counties in the State to do some planning and has more extensive requirements for the largest and fastest-growing counties and cities in the State. Its requirements include guaranteeing the consistency of transportation and capital facilities plans with land use plans.

HSIP

Highway Safety Improvement Program (HSIP) began in FY 2006 to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. The HSIP requires data-driven, strategic approach to improving highway safety.

HRRRP

High Risk Rural Road Program (HRRRP). FAST replaces The Moving Ahead for Progress in the 21st Century Act (MAP-21) which eliminated the \$90 million set-aside for the HRRR program. A new HRRR Special Rule was created under 23 USC 148(g). The HRRR Special Rule requires a State to obligate a certain amount of funds on HRRRs if the fatality rate is increasing on rural roads. In Washington, this grant is administered by the Washington State Department of Transportation (WSDOT).

Impacts

Impacts are the effects or consequences of actions. Environmental impacts are effects upon the elements of the environment (WAC 197-11-752).

Interchange

A system of interconnecting roadways in conjunction with one or more grade separations, providing for the movement of traffic between two or more roadways on different levels.

Intersection

The general area where two or more highways join or cross, within which are included the roadway and roadside facilities for traffic movements in that area.

Land Use

The type of activity associated with a specific geographic area. Land use categories can be broad (residential, retail, office, industrial, and recreational), or they can be very specific (single-family residential, convenience market, or elementary school). In order to estimate trip generation characteristics for a specific geographic area, it is necessary to know both the type and intensity of land use (single-family residential land use at a development intensity of eight units per acre).

Level of Service (LOS)

The Level of Service is a grading system developed by the transportation profession to quantify the degree of comfort (including such elements as speed, travel time, number of stops, total amount of stopped delay, and impediments caused by other vehicles) afforded to drivers as they travel through an intersection or roadway segment. LOS is expressed as a letter grade that ranges from "A", indicating that drivers will experience little, if any delay, to "F", indicating significant traffic congestion and driver delay will occur.

Local Residential Access Streets

Local residential access streets provide direct access to adjoining properties within a neighborhood. Through trips are discouraged and parking is allowed. In general, these streets do not directly connect to arterials or collectors (CCC 40.350.030(A)(5)(c)(2)).

MAP-21

On July 6, 2012, the president signed into law P.L. 112-141, the Moving Ahead for Progress in the 21st Century Act (MAP-21). Funding surface transportation programs at over \$105 billion for fiscal years (FY) 2013 and 2014, MAP-21 is the first long-term highway authorization enacted since 2005. MAP-21 represents a milestone for the U.S. economy – it provides needed funds and, more importantly, it transforms the policy and programmatic framework for investments to guide the growth and development of the country's vital transportation infrastructure.

MVFT Motor Vehicle Fuel Tax.

Mitigation

(1) Avoiding impacts altogether by not taking a certain action or parts of an action; (2) minimizing impacts by limiting the degree or magnitude of the action and its implementation by using appropriate technology, or by taking affirmative steps to avoid or reduce impacts; (3) rectifying impacts by repairing, rehabilitating, or restoring the affected environment; (4) reducing or eliminating impacts over time by preservation and maintenance operations during the life of the action; (5) compensating for impacts by replacing, enhancing or providing substitute resources or environments; and/or, (6) monitoring impacts and taking appropriate corrective measures (WAC 197-11-768).

Mode

The means by which travel is accomplished. Alternative modes of travel include walking, bicycling, auto, bus, light rail, airplane, ferry, etc.

National Highway Performance Program

The programs include the Interstate Maintenance program, National Highway System, and the Highway Bridge Replacement and Rehabilitation Program.

NAAOS

The National Ambient Air Quality Standards were set up by the Environmental Protection Agency (EPA) to help mitigate the health impacts of air pollution. EPA established NAAQS measure for six pollutants that include carbon monoxide, ozone, particulate matter, lead, sulfur dioxide, and nitrous oxide.

Non-attainment Area

Geographic area in which air pollution levels exceed the NAAQS.

UCP Urban Corridor Program (TIB Funding).

UAP Urban Arterial Program (TIB Funding).

UR-SP Urban Sidewalk Program (TIB Funding).

Peak Hour

Sixty consecutive minutes during which an intersection or roadway system experiences the greatest amount of traffic volume.

P.M. Peak Hour

A one hour period in the afternoon or evening when traffic flow increases. The p.m. peak hour typically occurs between 4 and 6 p.m. Traffic volumes occurring during the p.m. peak hour are used to calculate the overall operation of a roadway or intersection.

PLHD Public Land Highway Discretionary.

PWB

Public Works Board. The Public Works Board was created by the 1985 Legislature. The Board is comprised of local government officials, special purpose district representatives, and private sector members. The mission of the Washington State Public Works Board is "to assist Washington's local governments and private water systems in meeting their public works needs to sustain livable communities." The Board is authorized to loan money to counties, cities, and special purpose districts to repair, replace, or create domestic water systems, sanitary sewer systems, storm water systems, roads, streets, solid waste and recycling facilities, and bridges.

PWTF

Public Works Trust Fund. This trust fund is administered by the Public Works Board. The PWTF Construction and Pre-construction Loan Programs provide funds to design, repair, replace, or create a facility. These loans have a five to twenty year term with an interest rate of only one-half percent. The maximum for any agency is ten million dollars per biennium.

RAP

Rural Arterial Program (State funding source) is a CRAB funding source. In 1983 the legislature created the RAP to help finance reconstruction of rural arterial roads. The program is funded with 0.58 cents of the Motor Vehicle Fuel Tax (MVFT).

RCW

The Revised Code of Washington contains all the laws of the state of a general and permanent nature.

REET Real-estate Excise Tax

RCO Washington State Recreation and Conservation Office

RTC

Southwest Washington Regional Transportation Council. RTC is the regional transportation planning agency for Clark, Klickitat, and Skamania counties.

Right-of-Way

Right-of-way is property held by the county for existing or future public roads or other public improvements.

Roadway Conditions

The geometric characteristics of the street or highway, including the type of facility and its development environment, the number of lanes (by direction), lane and shoulder widths, lateral clearances, design speed, and horizontal and vertical alignments.

Roadway

A roadway is the improved portion of an easement or right-of-way, excluding curbs, sidewalks and ditches. Road, roadway and street will be considered interchangeable terms.

Roadway Section

A roadway section is a cross-section of a roadway which displays, travel lanes, turning lanes, bike lanes, sidewalks, and medians with their respective dimensions. Each classification of roadway has a corresponding roadway section.

SCFRRP

Salmon Creek/Fairgrounds Regional Road Plan.

SEPA

State Environmental Policy Act. SEPA is a state law requiring agencies to consider the environmental consequences of their decisions (WAC 197-11-790).

STP

Surface Transportation Program (Federal funding source). The objective of the STP is to fund construction, reconstruction, resurfacing, restoration and rehabilitation of roads functionally classified as arterials.

Signal Warrant

A criterion that must be met before the installation of a traffic signal can be considered.

Significant/Significance

- 1) Significant as used in SEPA means a reasonable likelihood of more than a moderate adverse impact on environment quality.
- 2) Significance involves context and intensity and does not lend itself to a formula or quantifiable test. The context may vary with the physical setting. Intensity depends on the magnitude and duration of an impact. The severity of an impact should be weighed along with the likelihood of its occurrence. An impact may be significant if its chance of occurrence is not great, but the resulting environmental impact would be severe if it occurred (WAC 197-11-794).

SWCAA

Southwest Washington Clean Air Agency, is a government agency responsible for air pollution control and planning in Clark, Cowlitz, Lewis, Skamania, and Wahkiakum Counties.

Stormwater Facility

Stormwater facility means the natural or constructed components of a stormwater drainage system, designed and constructed to perform a particular function, or multiple functions. Stormwater facilities include, but are not limited to, pipes, swales, ditches, open channels, culverts, storage basins, infiltration devices, catch-basins, manholes, dry wells, oil/water separators, and sediment basins (CCC 40.100.070).

TDM

Transportation Demand Management is a demand-based technique for reducing traffic congestion, such as ride-sharing programs and flexible work schedules enabling employees to commute to and from work outside of peak hours.

TIB

The Transportation Improvement Board is a state funding agency and administers several state funding programs. The mission of the TIB is to assist local agencies to preserve and improve transportation systems by providing financial assistance, supporting economic development, promoting multi-jurisdictional and multi-modal coordination and to promote public/private cooperation.

TIF

Transportation Impact Fee. TIF is the traffic impact component of a development impact fee that was adopted in August 2001 (ordinance number 2001-08-01A) and an update was newly adopted on September 25, 2007 (ordinance number 2007-09-14). An impact fee is a fee levied on a developer by the county as compensation for expected effects of the development.

TIP Six-Year Transportation Improvement Program.

UAP

Urban Arterial Program (State funding source) was established by the State in 1967 as the Urban Arterial Trust Account (UATA) and was designated as the AIP in July 1999. The purpose of this program is to fund city and urban county arterial road and street projects to reduce congestion and improve safety, geometrics, and structural concerns.

UCP

Urban Corridor Program (State funding source) was established by the State in 1988 as the Transportation Improvement Account (TIA) and was designated as the TPP in July 1999. The purpose of the program is to fund projects on the regional transportation plan that are necessitated by existing or future congestion due to economic growth.

UR-SP

Urban Sidewalk Program (State funding source) was established by the TIB in 1994 as the Pedestrian Facilities Program (TIA-PFP) and was designated as the PSMP in July 1999. The program goal is to enhance and promote pedestrian mobility by providing funding for pedestrian projects that provide access and connectivity of pedestrian facilities.

V/C Ratio

The ratio of volume to capacity for a traffic facility.

Volume

The number of vehicles passing a point on a lane or roadway during some time interval, often taken to be one hour, but may also be expressed in terms such as sub-hourly, daily, or annually.

WAC

Washington Administrative Code. The WAC is laws adopted by state agencies to implement state legislation.

WSDOT

Washington State Department of Transportation. WSDOT is a department of the State of Washington responsible for transportation related planning, management, and coordination.

WW&RP Washington Wildlife and Recreation Program.

Zoning

A map and ordinance text which divides a city or county into land use "zones" and specifies the types of land uses, setbacks, lot size, and size restrictions for buildings within each zone.
