Good Morning,

I am sending this email in regards to Alt 4. I had hoped that I would be able to attend today's County Councilor's meeting, but I am unable to. As I have reviewed Alt 4, I have to say I am not supporting it and ask that you do the same! Alt 4 I am afraid will help destroy our agriculture industry put our county at risk for our very own food supply.

Let me explain: In the event of a major Terrorist attack and commerce stops, how are people in Clark County going to have access to food/food stuff/ agriculture products? Especially if our agriculture industry is decimated? As we know with the recent Paris attacks, it is a very real threat! I think our community would have plenty of water, but please consider our food supply.

I feel for the land owners who see Alt4 as an option to their land, however they bought or have had that land for agriculture use and should really look at selling it to someone or a company that is willing to use it for that intent.

I ask that you not vote for Alt4. The times have changed. And we are at great risk. We need our county to be part of the planning to help keep us safe and secure. The US government is not going to come to our aid as fast as we might think. Please preserve our food supply ability.

Thank you Maria Salazar
