Subject: Clark County growth plan/comp plan

Thank you Mr. Euler for assisting me in preparing written comments to be submitted to the Clark County Planning Commission in connection with their review and work on potential amendments to Clark County' Growth management plan/comprehensive plan.

I apologize for the lateness of my comments but I only discovered the deadline at 8 o'clock this morning in reading the Colombian newspaper

I would like to submit three amendments: 1) prohibit any oil refineries; 2) prohibit any oil terminals or facilities that store over 100,000 gallons or 2,3810 barrels of petroleum products; 3) prohibit the establishment of any coal terminals or storage locations containing more than 50 tons of coal.

These recommendations are made based on the recent train accidents, spills, fires, deaths caused by leaks as it affects number one and two above. First responders are not prepared for the crisis created by a major fire. These uses have a potential impact on the Columbia River not only as to humans but endangered fish species. Emergency (fire, police, and ambulance) response to our citizens will be subject to slower response times due to the need to cross rail lines clogged by mile long trains.

These uses require large tracts of land with limited employment but with major greenhouse gas problems resulting in climate change.
