Councilor:

Please, go to the J:/drive under DSEIS and all the documents should be there. Please review and I think staff did exactly what you are looking for. The figures are separate. Thanks.

Best,

Oliver

Oliver,

To start with, it would be helpful as step one, to simply provide the main sections that are primarily text. Step two can include the graphics.

Thanks

David

Hello Councilor:

I don't think ESA provided us the word version due to large number of photos and maps. I call them and have provide us a disc of the full documents. Upon receiving that staff will provide that to you. Thank you.

Best,

Oliver

Oliver,

Thank you for the attempt. But as you can see, converting from a pdf file to a Word file introduces numerous spelling and formatting errors. The result is useless.

The only reliable source is to go to the original source which is in Word and simply providing a copy of that original file.

Thank you,

David

Hello Councilor:

Per your request, staff converted each chapter from PDF to word and you can now find it on the J drive. If for some reason there are things you can't find please, let us know. Thanks.

Best,

Oliver
