Subject: RE: Environmental Impact Assessment

Dr. Alan,

I talked with one of the members of the technical committee today and look forward to them providing expert insight on this subject. So it appears that the need will be met.

Thanks

David

Hi Councilor Madore,

I received your voice mail about the EIA. Our staff are trained to evaluate septic system designs and operations on individual parcels, based on the dwelling, number of occupants, soil conditions on that particular site etc. Unfortunately, we do not have expertise or experience in planning, conducting or evaluating large scale environmental impact assessments. Consequently, I don't believe we have the knowledge or ability to give an expert opinion on the EIA.

Please contact me if you have additional questions.

Best regards,

Alan
