Hello,

Here are your copies of written testimony submitted during the Oct. 20 Comp Plan hearing. There's also one from Carol Levanen that was submitted on Oct. 27 during general public comment.

Also, I've mailed a packet of information to Cindy Holley (sign-in sheets, written testimony, maps, etc.).

Thanks and have a great day. :)

RE: Clark County Rural communities

My concern to Mr. Villanueva: C.C. has never had a policy of inclusiveness with the rural communities

Susan,
This appears to be a weighty problem but not insurmountable. A couple of thoughts here – organizing the rural constituency in Clark County to somehow speak with a unified voice about the items that you note are of concern, is the first item that comes to mind. Is there a community leading entity that could help you do that? Also, having elected officials attend this – that is local, state and federal folks, that could benefit from the “daylighting” of rural concerns here and elevate that to their level of policy thinking might be helpful. Holding a rural forum of sorts to do this, could help galvanize some political will and influence around issues of concern could prove helpful. I am willing to attend an event like that and speak about the key work that our agency, USDA Rural Development is doing in these areas. In particular our comments could focus on the importance of helping making our rural areas sustainable. If a unified rural Clark County voice could be garnered in this manner to weigh in on the county’s Comprehensive Growth Plan process, it might get at tending to some of your stated concerns.

This all said, I (USDA Rural Development) have to be able to respond to help with this, but can’t be the convener. WSU Cooperative Extension might be a great partner to talk to about helping you work on this. Here is a link to their website: http://cahnrs.wsu.edu/extension/. Let me know how I can help, and best wishes on your efforts to preserve the rural way of life in Clark County.

Re: CCNRC Green Alternative Details

Dear Peggy:

Thank you for your inquiry regarding details of CCNRC's Green
Alternative, and the County's apparent consideration of including
this alternative as a full and complete alternative in the Growth
Management DEIS. As you know, CCNRC's Green Alternative has four
elements: 1) reduced Urban Growth Boundaries; 2) enhanced Ag and
Forest Land protections; 3) increased Critical Land protection; 4)
vigorous rural development limitations. Here is a brief outline of
the elements that we consider key to any Green Alternative:

I. URBAN GROWTH BOUNDARIES
   A. Shrink all Urban Growth Boundaries from approved Interim
      Boundaries.
   B. Shrink Vancouver UGB based on map I presented at recent
      meeting with County staff, except exclude all of Felida west
      of McCann Road.
   C. Shrink Washougal UGB by area inside Columbia Gorge
      National Scenic Area.
   D. I would be more than happy to take a few minutes and sit
      down with you and other staff, to go into more detail on each
      of these UGBs. Please call and schedule a time if you are
      interested.

II. INCREASED AG/FOREST PROTECTIONS.
    A. Increase lands designated for Agriculture by removing
       parcelization criteria; paramount factor should be soil type.
    B. Lands currently useable as both Ag/Forest but currently
       fall into neither category should be categorized as Ag/Forest
       with appropriate minimum acreages.
    C. Minimum acreages described in Internal Draft 3-11-94
       Alternative C are acceptable for SEPA purposes for Ag and
       Forest minimum lot sizes.

III. RURAL DEVELOPMENT SCENARIOS.
    A. Minimum lot sizes suggested in 3-11-94 Internal Draft
       acceptable, but should be re-labeled to: 10 acres: Rural; 15
       acres: Rural Conservancy.
    B. Clear and specific policies limiting development on
       currently valid but soon to be substandard lots must be
       include Potential solutions include: 1) a lottery for
       building permits that will ensure that no more than
       approximately 1/20th of the rural residential growth

1. Projection is implemented per year; 2) required amalgamation of rural lots; and 3) an aggressive program of transferrable development rights, excise tax increase to buy development rights, etc. to obviate any major takings concerns.  
C. Substantially reduced or eliminated “rural activity centers”.

IV. INCREASED CRITICAL AREA PROTECTIONS.  
A. Broad extension of strong wetland regulations including, but not limited to, rural areas and Category 5 wetlands.  
B. A broad program of sensitive wildlife habitat protection beyond the Washington Department of Wildlife PBS program as to be recommended by the scientist Citizens Wildlife Habitat Committee.  
C. Substantial new development limitations in Critical aquifer recharge areas, floodplains, steep slopes, etc.

I hope this outline provides you sufficient detail as to be able to include, analyze and model a Green Alternative in the Draft EIS. If you have any questions regarding any of these issues, or wish more details (for example, like on Urban Growth Boundaries), I will gladly meet with you to discuss these issues. Please be advised that I will be on vacation from April 1 through April 14. Also please be advised that CCNRC is willing to accept combining the Rural Clark County Preservation Association Rural Alternative with CCNRC’s Green Alternative. Although there are minor differences between CCNRC and the rural group’s plan (CCNRC opposes family compounds, requests larger lot sizes for Forest zones), the Internal Draft of 3-11-94, combined with the comments herein, should help to accurately present a comprehensive course of action that is both consistent with CCNRC and the Rural Clark County Preservation Association’s interests, and is the best course of action for the community.

Thank you again for your continued consideration of including a Green Alternative as a full and complete alternative in the Growth Management Plan EIS.

Sincerely yours,

John S. Karpinski
