Subject: Please keep nature in Growth Management Plan

Dear Clark County Councilors

I am writing to urge you to maintain as much open space as possible in your growth management plans for the county

In my view, dividing open land into many small parcels is a bad idea

- It would mar the green beauty of our County. This is a rare and priceless treasure
- It would reduce the acreage of open space than many nature enthusiasts value.
- It would change natural scenic areas into a patchwork of houses, lawns, and roadways.
- It would disrupt migration corridors for birds and animals

Please consider the Conservation Futures Program in this most important matter

Thank you for your consideration of public comments.
