Subject: Update with Alternative 4

Comments

My family has owned this 20 Ac property since 1948 and I have resided here with my family since 1965. It is now a productive tree farm, with over 7,000 growing trees. My goal has always been to have two of my children live near us on the property to help with tree farming activities as I grow older and less capable of physically demanding work. I request that you respect rural citizens of the County and protect their rights to property for family use and enjoyment of land they have invested heavily in and value highly. Therefore, I urgently request the County adopt Alternative 4 in approving Clark County's Comprehensive Land Use Plan.
