Message: Councilors and Staff,

I urge you to do what you possibly can to bring back some options for rural landowners in Clark County. If development in the rural areas is an "environmental" concern for anyone, I ask that you please take another look. From what I've seen, the rural landowners are excellent stewards of the land, and are the true "environmentalists" (farming, raising animals, growing gardens, etc).

Thanks for your work,
Evan Marttila
