Subject: Show your work - basis documentation

Oliver,

You have asked me for more documentation that shows the source notes and specific basis for the reports I have provided for the Comp Plan assumptions, graphs, and tallies

I will be happy to provide that and include the extra points that you addressed in your most recent presentation to the Planning Commission I hope to have that body of work available by the middle of this month I believe that ESA and Thorpe will each find that very useful too

Thank you,

David
