**Subject:** Submission of GIS maps showing current use with soil information

To: Clark County Council, Honorable Mark Boldt Chairman, Clark County Planning Commissioners, Dr. Oliver Orjiako

Please accept the attached Clark County GIS Map to the record for the 2016 Comprehensive Plan. The maps show the AG current use overlay using land capacity classifications with the zoning under the preferred alternative. In looking at the map, one will see that AG current use is located on much of the AG land throughout the county as well as other zoning classifications. This map highlights that agriculture is very active throughout the county and needs to be supported with good zoning, buffering, and water resources to continue to thrive. The map also shows areas with good soils that could support agriculture.

Thank you,  
Heidi Owens

# Prime Farmlands Clark County, Washington

- All areas are prime farmland
- Farmland of statewide importance
- Prime farmland of special interest
- Prime farmland of moderate and other protected from flooding or not frequently flooded during the growing season
- Prime farmland of moderate and other protected from flooding or not frequently flooded during the growing season
- Not prime farmland
- Current Use - Agriculture
- Urban Growth Boundary
- City Limits
- Rural Center
- Planned Alternative - Rural & Resource Zones
