Dear Councilors,

This is the information regarding water supply in Clark County that was forwarded to me by engineer, Eric Beck, who has worked for CPU in the water department for many years. He said this manual took six years to compose by DOE, with everyone at the table. All water purveyors must use this manual. He said the wells in this area are tidal waters influenced by the ocean, and unless the ocean dries up, will never be compromised for availability.

Best Regards, Carol Levanen, Ex Secretary, CCCU, Inc

Hello Carol,

Attached is some light reading. I hope it helps.

Eric
